Box V.

The subject matter of claims 1 to 9 is considered to involve an inventive step pursuant to PCT Article 33(3), since it refers to an improved product, such as a washing machine in which deterioration of the laundry can be avoided, while providing economic benefits by using the oil reclaimed by a reclamation process and has an advantage in that the user can easily finish the maintenance in a shorter time by using the self-diagnostic function and the remote maintenance function, which is not known or even suggested in the prior art, particularly in D1 and D2.

Claims 1 to 9 also meet the criteria set out in PCT Article 33(4), because all the claims are considered to be industrially applicable.
